BAMBOO

- Bamboo is a **natural, abundant & highly renewable plant based resource**:
Bamboo is a **very fast-growing plant** : It grows 16 times faster than wood
- **Bamboo is strong and durable**:
Very rigid, bamboo is 3 times stronger than wood
- Bamboo is **environmentally friendly**:
The plant's deep root systems protect against soil erosion and does not require replanting after harvesting

SUSTAINABLE with excellent performance

- **100% natural, without any additives or chemicals**, the new BePulp bamboo cutlery range is fully safe for your health and food
- It will also meet all your requirements, thanks to its **stylish and table ready look** and its **perfect functionality** : Resistance to cold and hot food and drink, exceptional strength, much more pleasant sensation in mouth than wood cutlery
- Bamboo cutlery can be disposed of with **wood waste** or **green waste**, according to local regulations
